

Study of Language (Rainbow Song)

Much Like a rainbow, 6 separate colors will combine to make one beautiful creation.

Sitting in a circle, 6 players will take turns playing their color of the rainbow, in color order (Red, Orange, Yellow, Green, Blue, Violet) showing off both the shapes, and the colors of the graphic scores. After each player has played their solo, all together they will “Play the Rainbow;” all playing together and making beautiful harmony. Other players should feel free to improvise percussion while players are soloing, as well as listening to other players and playing off of their material because some colors are complimentary and some are contrary to one another.
